CyberMusicMix Mix-It Program

List Of Songs You Want To Mix:

1.

Name of New File To Save:

2.

3.

Note: Do Not Confuse the capability of mixing two or more tracks here with the purpose of the CyberMusicMix web site

TRACKS that are to be Uploaded to the web site SHOULD NOT contain a Mixed Version of Your Track and someone else's Primary Track. Remember, the Web Site already has a copy of the Primary Track and the Sites' purpose is to highlight (more or less) individual talent. Just like soup, once a mix is completed it can not later be disassembled

CyberMusicMix Adjust Volume Program

Name of Track To Adjust Volume

Steps:

1. **Get Track From Disk**

Name of New File To Save

2. **Select File To Save**

3. Louder

On some occasions you may find yourself needing to adjust the overall volume of a recording. This module will allow you to do just that.

Generally, the melody of a song should stand out more than anything else in the mix. When you make your Comp track (for another recording)

4. Softer

Fig 7

CyberMusicMix Fade Program

Name of Track To Cut Portion From

Name of New File To Save

Steps:

1. Get Track From Disk
2. Select File To Save
3. ☐ No Change
☐ Fade In
☐ Fade Out
☐ Fade In & Out
4. Save Changes Now

You may find yourself wanting to have your track Fade IN, Fade OUT or Both. This means that the sound volume will either start low and get louder (up to normal) at the beginning of the song (Fade In) or end the song by getting softer for the last few

CyberMusicMix Add Track To End Of Track

Name of Track To Add To **Steps:**

1.

Name of File To Add To End Of Above :

2.

Number Of Times To Loop This Process : 3.

This nifty little feature is available for those that realize they need to add some 'sounds' to the 'end' of a previously recorded track.

These 'sounds' could be additional music or even a Laugh Track to be used if you are using this software to record a Joke.

This Procedure WILL Alter Your Original File. Use With Caution!
